December 6, 2016

Mr. Rene Cardoso sustained a financial loss because of his injury on July 16, 2013. The elements of loss considered in this preliminary report are earning capacity, personal services, and future medical care costs. Each element is appraised for the before- and after-trial periods with the after-trial losses discounted to present value as of January 2, 2017.

Mr. Cardoso was born on September 23, 1974, and was 38.81 years old at the time of injury. According to South Carolina Code Section 19-1-150, his life expectancy was an additional 39.27 years to age 78.08 on 2052.81. According to Mr. Cardoso, before he was injured, he had no reason to expect less than a normal life expectancy. According to Mr. Cardoso, he intended to work to age 67 (his normal Social Security retirement age).

FACTS TAKEN INTO CONSIDERATION

At the time of injury, Mr. Cardoso was employed as an Electrician with Hart Land Resources, LLC. Ms. Julie Sawyer-Little, MS, OT/R, CRC, CLCP, ABVE/F, evaluated Mr. Cardoso's before- and after-injury earning capacity.

According to Ms. Sawyer-Little, with respect to before-injury earning capacity, the hourly rate for the average to experienced range for Electricians in the Charlotte MSA is \$20.33 per hour to \$22.36 per hour. On an annualized basis, this ranges from \$42,286 to \$46,509 (average = \$44,398 per year) in 2016 dollars. According to Ms. Sawyer-Little, with respect to after-injury earning capacity, "Since his original injury, Mr. Cardoso has attempted to return to competitive employment but has not been able to sustain any employment for a significant period of time. His inability to sustain competitive

employment is based on a combination of his physical limitations, chronic pain, and cognitive issues.”

LOSS IN EARNING CAPACITY

For purposes of this report, it is assumed that \$44,398 per year in 2016 dollars is a reasonable measure of Mr. Cardoso's before-injury earning capacity. For purposes of this report, it is assumed that because of his injury, Mr. Cardoso is unemployable in the competitive labor market. The before-trial loss in earning capacity is \$154,059. The present value of the after-trial loss in earning capacity is \$835,708.

LOSS IN PERSONAL SERVICES

Before he was injured, Mr. Cardoso performed an average of 10 hours per week of personal services. He performed personal services including cooking, washing dishes, laundry, vacuuming, general housecleaning, grocery shopping, and lawn care. According to Mr. Cardoso, for approximately 6 months after his injury, he was unable to perform any personal services. Since approximately January 17, 2014, he has been able to perform about 2 hours per week of personal services. This creates a net loss of 8 hours per week of personal services.

The loss in personal services is appraised on a current basis at \$9 per hour. The before-trial loss in personal services is \$12,308. The present value of the after-trial loss in personal services is contained in the life care plan.

FUTURE MEDICAL CARE COSTS

Because of the injuries sustained by Mr. Cardoso, he will require medical care for the remainder of his life. Ms. Sawyer-Little also prepared a Life Care Plan for Mr. Cardoso. Elements of the Life Care Plan, frequency, current annual or periodic cost, and duration of each element are contained in Exhibit 1. The present value of the total future medical care costs is \$979,465. Exhibit 2 contains a summary.

TOTAL FINANCIAL LOSS

The present value of the total financial loss is \$1,981,540. Elements of this loss are contained in Exhibit 3. This report does not contain an evaluation of past medical care costs or a reduction to the loss in earning capacity to reflect any income Mr. Cardoso may have earned since his injury. This report is subject to revision to reflect any additional information that may become available.
